Skills

- Laravel
- PHP
- Livewire
- MySQL
- JavaScript
- VueJS
- JQuery
- CSS
- HTML

knowledge

- SOLID
- Design Patterns
- Problem Solving
- Database Schema
- Rest API
- WebSocket
- Git

Summary & Objectives

I have extensive experience in web development, utilizing various technologies such as Laravel, Livewire, MySQL, JavaScript, VueJS, and JQuery. I prioritize conducting thorough code reviews before committing changes, ensuring that the code is clean, readable, and easily expandable. Moreover, I consistently apply object-oriented programming principles, specifically the SOLID principles, and select appropriate design patterns to solve problems efficiently. I possess a strong interest in staying up-to-date with the latest developments in the industry, consistently seeking out new knowledge and advancements.

Projects

Tech-Store

Description

Online

The website has four types of users: super admin, admin, user, and guests. Each user type has different permissions. The website is divided into three categories: mobiles & tablets, TVs, and laptops & PCs.

Note: Users can become an admin for a limited period of 3 days by clicking on the "be an admin" button.

Main used technologies

- Laravel / MySQL / Blade / Livewire / JQuery / More

Real-time Chat, To-Do List, And Whack-a-Mole Game

Description

Authentication: Prior to accessing the website, it is necessary to either log in or register.

Real-time Chat: The chat module consists of three columns: suggested users, friends, and a public chat room. Users have the ability to send friend requests, remove pending requests, and unfriend existing friends. Accepted requests enable private conversations.

To-DO: Within the To-Do module, you can add tasks, edit them directly, mark them as complete, delete individual tasks, or delete all tasks at once.

Whack-a-Mole Game: This widely recognized game has been developed with six holes and a high-speed timer to keep track of the top score.

Main used technologies

- Laravel / Web-Socket / VueJS / Laravel Echo / More

PHP MVC framework

Description

In this framework, you can define your own routes similar to Laravel. You can also create your own controllers, models, and views.

If you're interested, I highly recommend visiting the repository for the documentation.

Main used technologies

- PHP / OOP

Spry Validator Plugin

Description

This plugin is an added layer on Adobe Spry Validation open source. It includes custom error messages and additional functionality to facilitate AJAX requests, making it more user-friendly and versatile.

For more detailed information, refer to the documentation provided for this JQuery plugin.

Main used technologies

- JavaScript / JQuery

Current Work

I am currently employed as a back-end developer at **RayaGate IT Company**. Here are the projects I have contributed to:

- CMS System:** I developed a content management system for a university in Germany.
- K-Link Project:** I am currently working on a multi-tenant system that is being built to support transportation companies in the German market. This system will be able to handle multiple databases.

Education

Bachelor's degree from Faculty of Commerce, Alexandria University, Egypt.
