Summary & Objectives

I have an excellent experience in web development, and I use many technologies like Laravel, PHP, Livewire, MySQL, JavaScript, VueJS, JQuery, CSS, and HTML.

I did many projects that gave me a lot of experience, especially in the framework of Laravel, so I got to know MVC structure, middleware, route groups, policies, roles, permissions, task scheduler, jobs, livewire, and more.

I'm always focusing on code review before committing and writing clean, readable, and extensible code.

I am also familiar with the VueJS framework, and I can use its tools like lifecycle hooks, Vuex, Axios, Pinia, composition API, router, and more.

I'm always trying to use the power of the OOP to apply the SOLID principles and chose a suitable design pattern for the problem.

Interested in what is new in the industry and keeping up to date with it.

Projects

Tech-Store

Description	Online

This website contains four different types of users who are super admin, admin, user, and guests, every type of user is allowed to do different things.

This website contains three different categories which are mobiles & tablets, TVs, and laptops & PCs.

Main used technologies

- Laravel / MySQL / Blade / Livewire / JQuery / More

Visit the website

- http://salah-tech-store.great-site.net/

Spry Validator Plugin

Description

This plugin is a layer on adobe spry validation open source with custom error messages and more functionality like making it fits AJAX requests, which makes the use of it easier and more generic.

There is documentation about this JQuery plugin for more details.

Main used technologies

- JavaScript / JQuery

Visit it on github

- https://github.com/salaheldeen911/Spry-Validator-Plugin

More

Description

There are more than 10 repositories available on my Github account, like Responsive Template, Preloader, VueJS to-do list with a Laravel Sanctum Api, PHP multiple choices exams system, and more.

You can find them all on my Github account https://github.com/salaheldeen911.

Education

Bachelor's degree from Faculty of Commerce, Alexandria University, Egypt.
